❖ SKILLS

JavaScript, Node.JS, jQuery, Express, React.js, Bootstrap (Framework), HTML5, Cascading Style Sheets (CSS), Front End Web Development, Git, GitHub, GitLab, Java, GUI, Web Development, NetBeans, XML, Relational Database Management System(MySQL), SQL, Scrum Methodology, Agile Methodologies, Sprint Planning, Technical Writing

❖ Software Developer

With a **Master degree in Computer Science** and certifications in **Java and SQL**, I have been working as a **software developer | scrum master** for various projects in Abmiro, a leading service provider for restaurants under Postree product.

My most recent role is **integrating 3 payment gateways for Postree clients** & working closely with client on IOT based project.

With 100% success rate of integration I received the opportunity to serve multiple projects as **Scrum Master**. I was given responsibility to help in building 1 **SmartLoc8 IOT Inventory Mobile Application** where I have created wireframes per requirement of client. I also facilitated agile processes, such as sprint planning, weekly summary calls and retrospectives, to deliver high-quality products on time and within budget.
